As of February, I have now been a financial advisor for 25 years. It feels crazy to write that. In some ways, my first job on Wall St. seems like yesterday...until I look at pictures of me back then (I had more hair and it was...darker). I started out as a stockbroker, progressed to working for a large, national investment firm, and then finally founded my independent practice that I have today. It is true what they say, "experience is the best education." Over the years I have worked with so many clients with varied backgrounds, careers and lives. I have been witness to the good things and bad things that have happened to them. Those experiences continue to drive the advice I give to clients. Lately, I have had some clients ask me when I plan to retire. Well, I love what I do...and look forward to what the next 25 years will bring. Some of you reading this have been my client for the whole 25 years and many others close to it. Thank you for the trust you have placed in me.

Spring 2019

Did You Know...?

Ten Money-Saving Travel Tips

Exploring the world sounds fun and exciting, but it can be expensive to travel. However, there are ways to experience the trip of your dreams on a budget. Follow these money-saving tips when planning your next vacation to help make it more affordable.

1. Join a frequent flyer program. It will probably take time to accumulate frequent flyer points, but the perks can be worth it. Depending on the program, rewards can include cheaper fares, upgrades, free companion tickets, and more.

2. Be flexible with scheduling. Timing your ticket purchases wisely can help you save big. Aim to travel during days of the week when airfare tends to be cheaper. Similarly, try to fly at unpopular hours (e.g., early morning or red-eye flights) for more affordable pricing. Avoid traveling during peak holiday seasons and school breaks, and be aware of big events such as conferences or trade shows that tend to make hotel prices soar.

3. Comparison shop. Research online to find the cheapest flights to your desired destination. Mix and match your airlines and airports for the best rates — you might discover that two one-way tickets are cheaper, overall, than purchasing one round-trip ticket. Consider all-inclusive options, since the up-front price you pay is usually the total cost of your trip.

4. Pack smart. Checked baggage fees can rack up quickly, especially if you exceed an airline's weight limit. Try to stick with carry-on luggage or just remember to pack lightly to avoid paying extra for overweight bags.

5. Consider alternatives to hotels. Lower-cost lodging options can include hostels, home-exchange programs, B&Bs, and vacation rentals. But they do require careful research. Find a match that best suits your needs by narrowing down potential options according to your budget, number of guests, length of stay, and space requirements. Look at ratings and reviews to determine whether a particular location and property will work for you.

6. Download apps to your smartphone. Take advantage of free travel apps that can help you save money on things like gas, car rental, airfare, hotels/accommodations, and more. Find and download messaging apps that your family and friends also have so you don't have to pay for text messages you send/receive while traveling.

7. Reduce mobile roaming charges. After a relaxing vacation, you probably won't want to come home to an expensive phone bill due to data roaming charges. Fortunately, many mobile networks offer data roaming deals, so check with your phone's carrier to learn about packages and discounts that may be available to you. And before you embark on your travels, adjust settings on your phone to disable data roaming as well as software downloads. App and phone updates are important, but most can wait until you are connected to Wi-Fi, which is available for free at many places.

8. Find free activities. Regardless of where you're traveling, it's likely that there are plenty of fun and free or low-cost activities. Sightseeing, walking, browsing stores, and attending local concerts/fairs/cultural events are great ways to explore a new place without spending too much (or any) money.

9. Act like a local. Blend in with the locals by dining out and shopping at stores located away from popular tourist streets. Prepare your own food when it's practical, and don't shy away from street food — it's less expensive than a sit-down restaurant.

10. Save on car rental. If possible, stick with public transportation on your trip. But if you must rent a car, book the cheapest option you can find online. You can save even more money by choosing to forego car rental insurance, but you'll want to review your existing auto insurance policy first to see if it comes with some form of coverage for rentals.

Rules on Opening a 529 Plan Account for College

Year over year, participation in 529 plans continues to rise.[1] Anyone can open an account, lifetime contribution limits are typically over $300,000, and there are tax benefits if the funds are used for college. Here are some common questions on opening an account.

Can I open an account in any state's 529 plan or am I limited to my own state's plan?

Answer: It depends on the type of 529 plan you have: college savings plan or prepaid tuition plan. With a college savings plan, you open an individual investment account and direct your contributions to one or more of the plan's investment portfolios. With a prepaid tuition plan, you purchase education credits at today's prices and redeem them in the future for college tuition. Forty-nine states (all but Wyoming) offer one or more college savings plans, but only a few states offer prepaid tuition plans.

529 college savings plans are typically available to residents of any state, and funds can be used at any accredited college in the United States or abroad. But 529 prepaid tuition plans are typically limited to state residents and apply to in-state public colleges.

Why might you decide to open an account in another state's 529 college savings plan? The other plan might offer better investment options, lower management fees, a stronger investment track record, or better customer service. If you decide to go this route, keep in mind that some states may limit certain 529 plan tax benefits, such as a state income tax deduction for contributions, to residents who join the in-state plan.

Is there an age limit on who can be a beneficiary of a 529 account?

Answer: There is no beneficiary age limit specified in Section 529 of the Internal Revenue Code, but some states may impose one. You'll need to check the rules of each plan you're considering. Also, some states may require that the account be in place for a specified minimum length of time before funds can be withdrawn. This is important if you expect to make withdrawals quickly because the beneficiary is close to college age.

Can more than one 529 account be opened for the same child?

Answer: Yes. You (or anyone else) can open multiple 529 accounts for the same beneficiary, as long as you do so under different 529 plans (college savings plan or prepaid tuition plan). For example, you could open a college savings plan account with State A and State B for the same beneficiary, or you could open a college savings plan account and a prepaid tuition plan account with State A for the same beneficiary. But you can't open two college savings plan accounts in the same 529 plan in State A for the same beneficiary.

Also keep in mind that if you do open multiple 529 accounts for the same beneficiary, each plan has its own lifetime contribution limit, and contributions can't be made after the limit is reached. Some states consider the accounts in other states to determine whether the limit has been reached. For these states, the total balance of all plans (in all states) cannot exceed the maximum lifetime contribution limit.

Can I open a 529 account in anticipation of my future grandchild?

Answer: Technically, no, because the beneficiary must have a Social Security number. But you can do so in a roundabout way. First, you'll need to open an account and name as the beneficiary a family member who will be related to your future grandchild. Then when your grandchild is born, you (the account owner) can change the beneficiary to your grandchild. Check the details carefully of any plan you're considering because some plans may impose age restrictions on the beneficiary, such as being under age 21. This may pose a problem if you plan to name your adult son or daughter as the initial beneficiary.

What happens if I open a 529 plan in one state and then move to another state?

Answer: Essentially, nothing happens if you have a college savings plan. But most prepaid tuition plans require that either the account owner or the beneficiary be a resident of the state operating the plan. So if you move to another state, you may have to cash in the prepaid tuition plan.

If you have a college savings plan, you can simply leave the account open and keep contributing to it. Alternatively, you can switch 529 plans by rolling over the assets from that plan to a new 529 plan. You can keep the same beneficiary when you do the rollover (under IRS rules, you're allowed one 529 plan same-beneficiary rollover once every 12 months), but check the details of each plan for any potential restrictions. If you decide to stay with your original 529 plan, just remember that your new state might limit any potential 529 plan tax benefits to residents who participate in the in-state plan.

Note: *Investors should consider the investment objectives, risks, charges, and expenses associated with 529 plans before investing. More information is available in each issuer's official statement and applicable prospectuses, which contain this and other information about the investment options, underlying investments, and investment company, and should be read carefully before investing. Also consider whether your state offers a 529 plan that provides residents with favorable state tax benefits and other benefits, such as financial aid, scholarship funds, and protection from creditors. As with other investments, there are generally fees and expenses associated with participation in a 529 plan. There is also the risk that the investments may lose money or not perform well enough to cover college costs as anticipated.*

Four Reasons Your Parents Might Be in Financial Trouble

When retirees were asked about their overall expenses and spending in retirement, 37% said they were higher than expected, 52% said they were about what they expected, and just 8% said they were lower than expected.

Source: 2018 Retirement Confidence Survey, Employee Benefit Research Institute

As your parents age, they will probably need more help from you. But it may be difficult to provide the help they need, especially if they're experiencing financial trouble.

Money can be a sensitive subject to discuss, but you'll need to talk to your parents about it in order to get to the root of their problems and come up with a solution. Before you start the conversation, consider the following four scenarios as signs that your parents might be experiencing financial challenges, and how you can make things easier for them.

1. They are dealing with debt

Perhaps your parents have fallen behind on their mortgage or credit card payments. Maybe they're dealing with the aftermath of a large, unexpected medical bill. Or it could be that years of generously supporting their children and grandchildren have left their finances in shambles.

Whatever the cause, debt among older Americans is a growing trend. In 2010, the average debt for a family in which the head of household was age 75 or older was $30,288. In 2016 (most recent data available), that number grew to $36,757.[1]

2. They are falling for fraud

According to a report by the Federal Trade Commission, older adults have been targeted or disproportionately affected by fraud. Moreover, older adults have reported much higher dollar losses to certain types of fraud than younger consumers.[2]

Why do scammers target older individuals? There are many explanations for this trend. Some older individuals lack an awareness about major financial issues. Others may be attractive targets for scammers because they have access to retirement account assets or have built up home equity. Additional factors that increase an older adult's vulnerability to scams include cognitive decline and isolation from family and friends.

3. They aren't used to managing finances

The loss of a spouse can create many challenges for the survivor, especially if the deceased spouse was in charge of finances. Many widows or widowers might find themselves keeping track of statements, paying bills, budgeting, and handling other financial matters for the first time, which can be a complicated reality to face.

4. They struggle with change

As financial institutions continue to innovate and increase online and mobile access to customer accounts, it can be difficult for older consumers to keep up. For example, some older adults may struggle with accessing their financial information online. Others might get frustrated or confused when financial institutions implement new policies and procedures, especially if they've had an account with an institution for decades.

One report described the most common issues that older consumers identified with bank accounts or services. The top three complaints involved account management (47%), deposits and withdrawals (27%), and problems caused by low funds (12%).[3]

Ways you can help

Regardless of the reasons why your parents might be having money problems, there are steps you can take to help them.

- **Set up a meeting with a financial professional.** Encourage your parents to meet with a professional to evaluate their financial situation.
- **Help them reduce spending.** Look for big and small ways that they can scale back on expenses, such as downsizing to a smaller home, cutting cable plans, or canceling unnecessary memberships/subscriptions.
- **Have them tested for dementia.** If you've noticed behavioral or memory changes in one or both of your parents, share your concerns with a medical professional. Cognitive decline can result in difficulty managing finances.
- **Lend money (using caution).** If you decide to help your parents monetarily, consider paying your parents' expenses directly rather than giving them cash so you can ensure that their bills are paid on time.
- **Help them apply for assistance.** The National Council on Aging has a website, BenefitsCheckUp.org, that can help you determine your parents' eligibility for federal, state, and private benefit programs.

What's the real return on your investments?

As an investor, you probably pay attention to *nominal return,* which is the percentage increase or decrease in the value of an investment over a given period of time, usually expressed as an annual return. However, to estimate actual income or growth potential in order to target financial goals — for example, a certain level of retirement income — it's important to consider the effects of taxes and inflation. The remaining increase or decrease is your *real return.*

Let's say you want to purchase a bank-issued certificate of deposit (CD) because you like the lower risk and fixed interest rate that a CD can offer. Rates on CDs have risen, and you might find a two- or three-year CD that offers as much as 3% interest. That could be appealing, but if you're taxed at the 22% federal income tax rate, roughly 0.66% will be gobbled up by federal income tax on the interest.

That still leaves an interest rate of 2.34%, but you should consider the purchasing power of the interest. Annual inflation was about 2% from 2016 to 2018, and the 30-year average was 2.5%.[1] After factoring in the effect of inflation, the real return on your CD investment could approach zero and may turn negative if inflation rises. If so, you might lose purchasing power not only on the interest but also on the principal.

This hypothetical example doesn't represent the performance of any specific investment, but it illustrates the importance of understanding what you're actually earning after taxes and inflation. In some cases, the lower risk offered by an investment may be appealing enough that you're willing to accept a low real return. However, pursuing long-term goals such as retirement generally requires having some investments with the potential for higher returns, even if they carry a higher degree of risk.

The FDIC insures CDs and bank savings accounts, which generally provide a fixed rate of return, up to $250,000 per depositor, per insured institution. All investments are subject to risk, including the possible loss of principal. When sold, investments may be worth more or less than their original cost.

Inflation Variation, Eroding Purchasing Power

Inflation averaged 2.5% for the 30-year period from 1989 to 2018. Although the recent trend is below the long-term average, even moderate inflation can reduce purchasing power and cut into the real return on your investments.

Annual rate of inflation, based on change in the Consumer Price Index
